LEFT BEHIND

This project is the trailer for *Left Behind*, a fictional game concept by Sebastian Smus and Jakob Vogel.

The storyline takes place in a lonesome, black & white world in which magic opposes technology. The player is meant to slip into a role of a lone character, fighting their path through puzzles and mysteries.

BROKE PROJECT

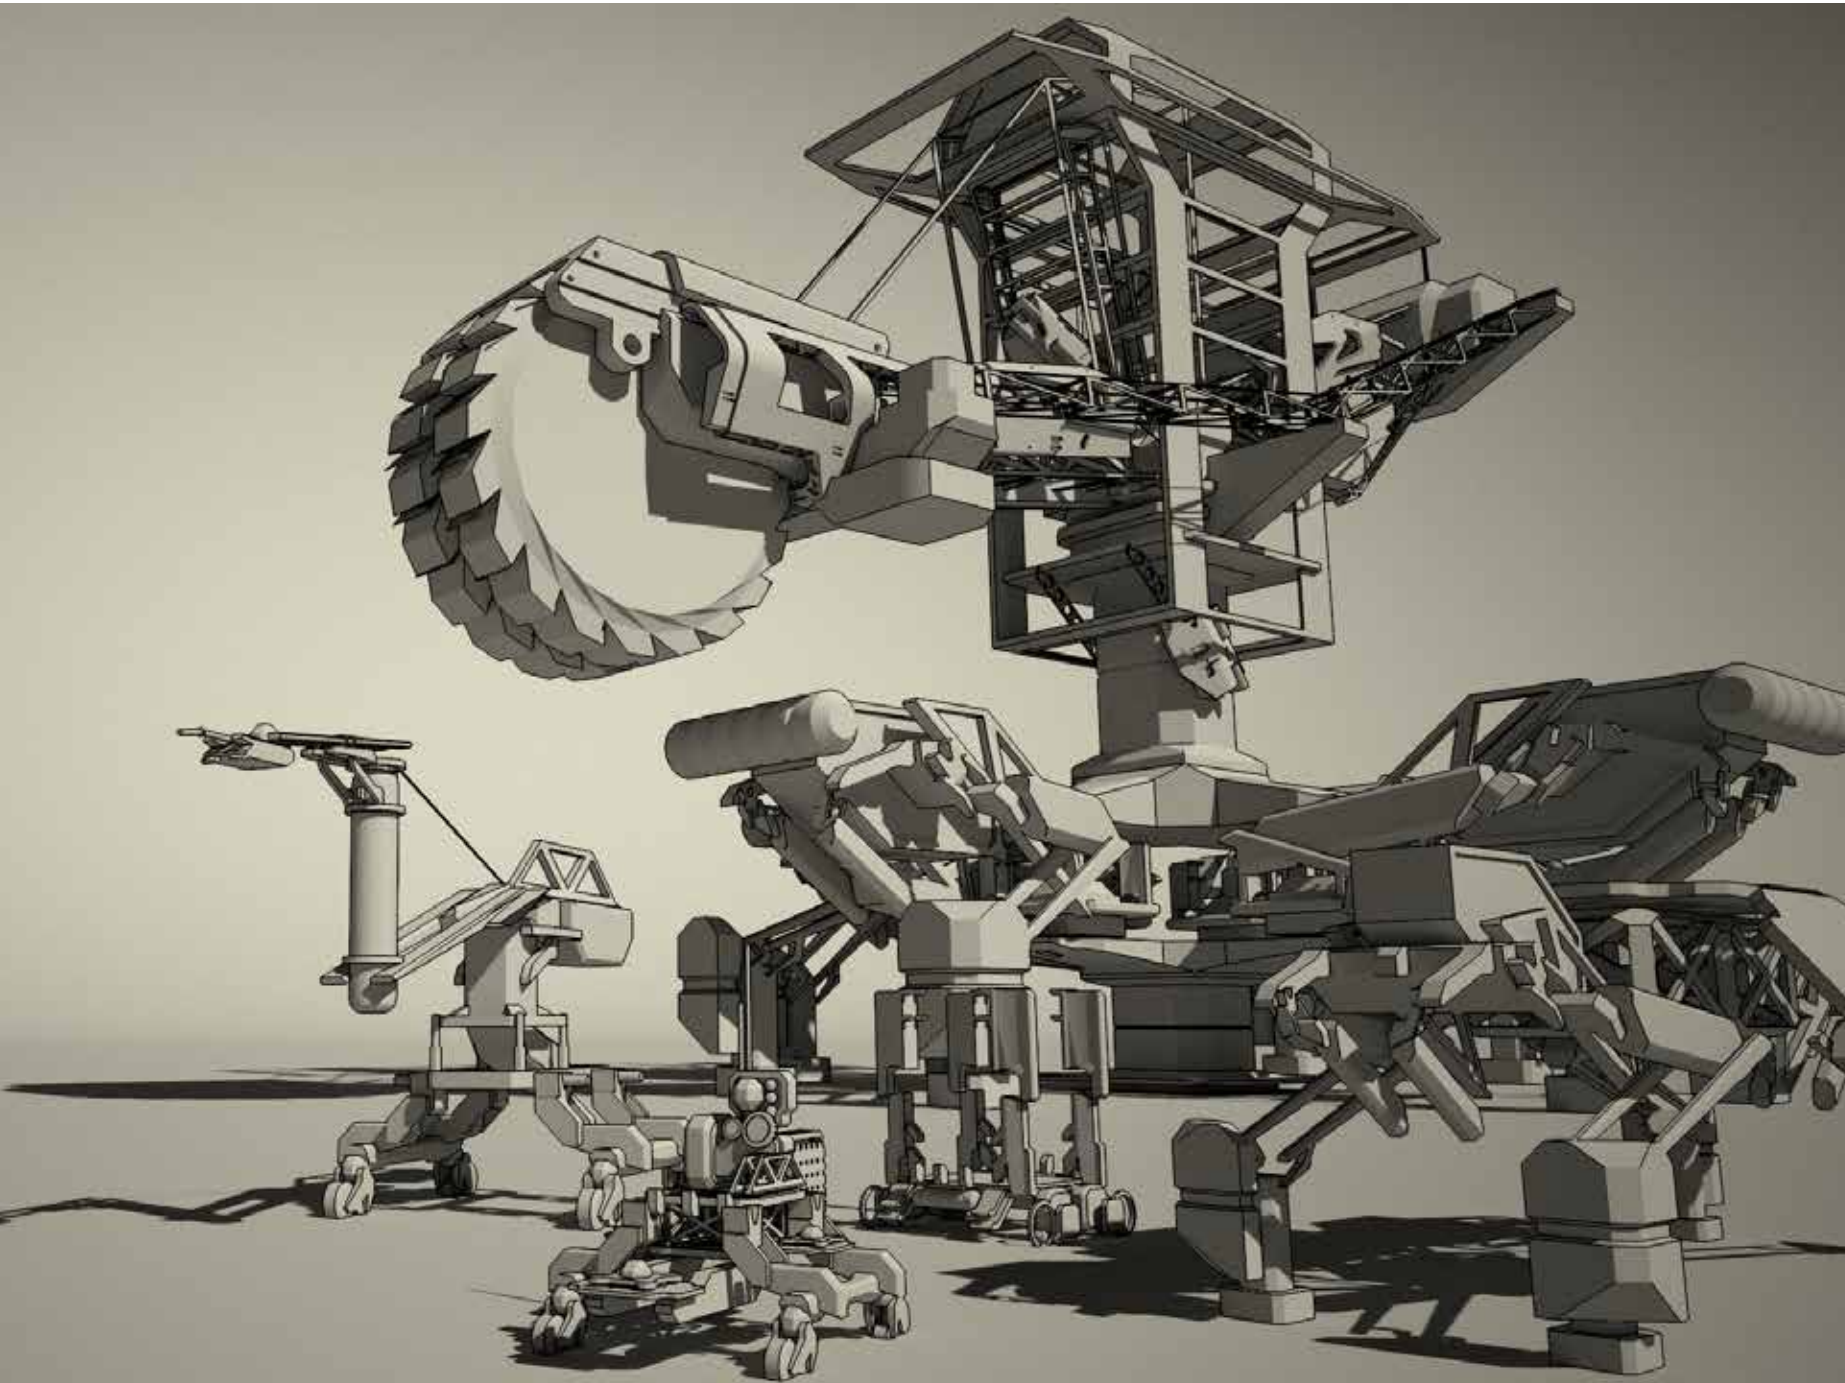

Broke is a 2min full CG animation project set in a dystopian scifi city, realised by multiple students, still in development.

This is a selection of Concept-Designs I did for the project.

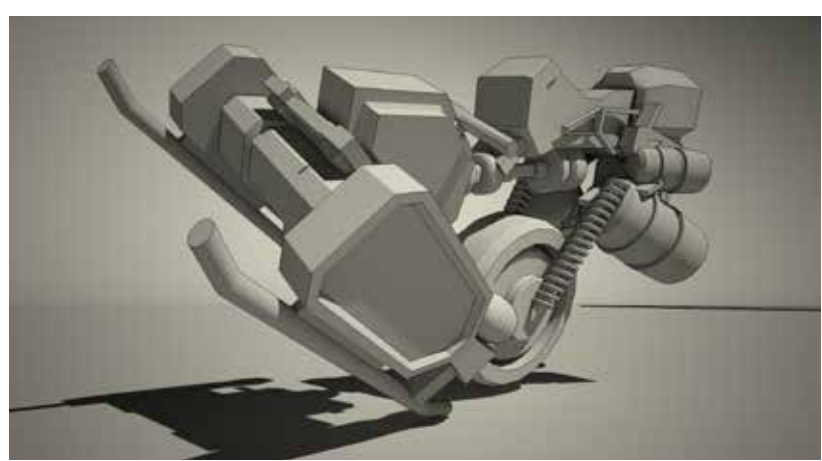

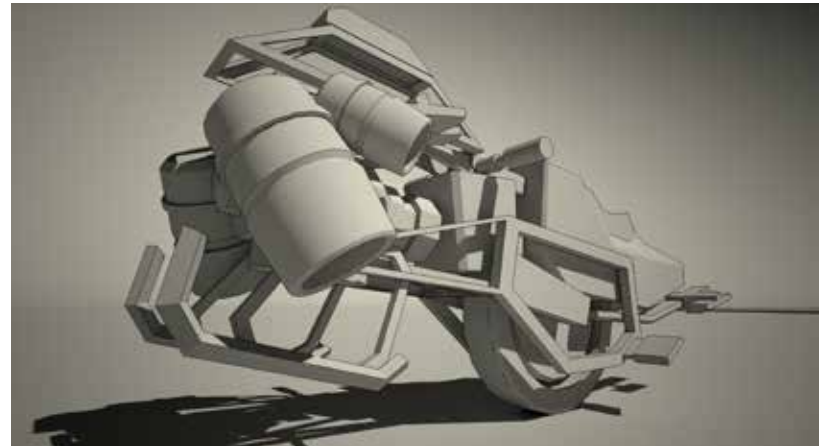

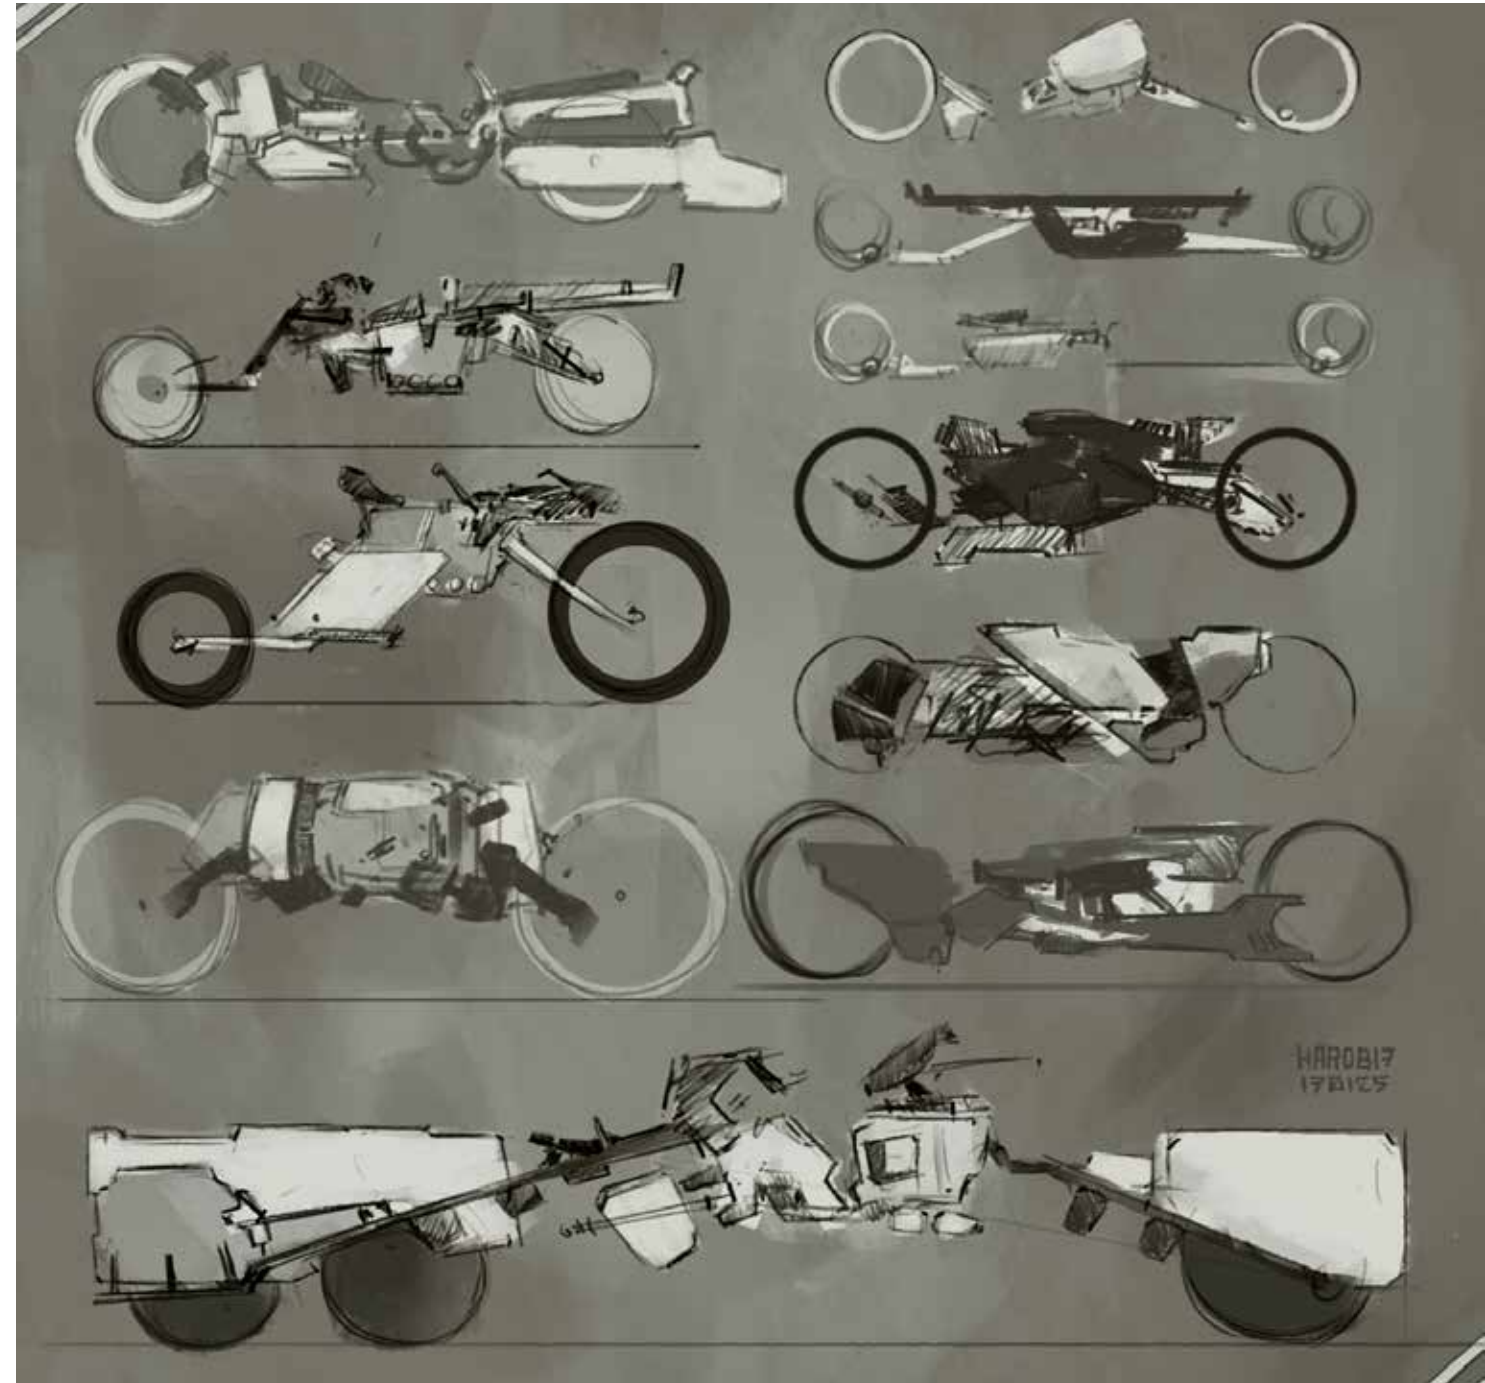

The city is fully autonomous and is only inhabited by machines. Design wise I oriented myself heavily on Industrial facilities and heavy machinery.

I also did early designs for the main characters motorbike.

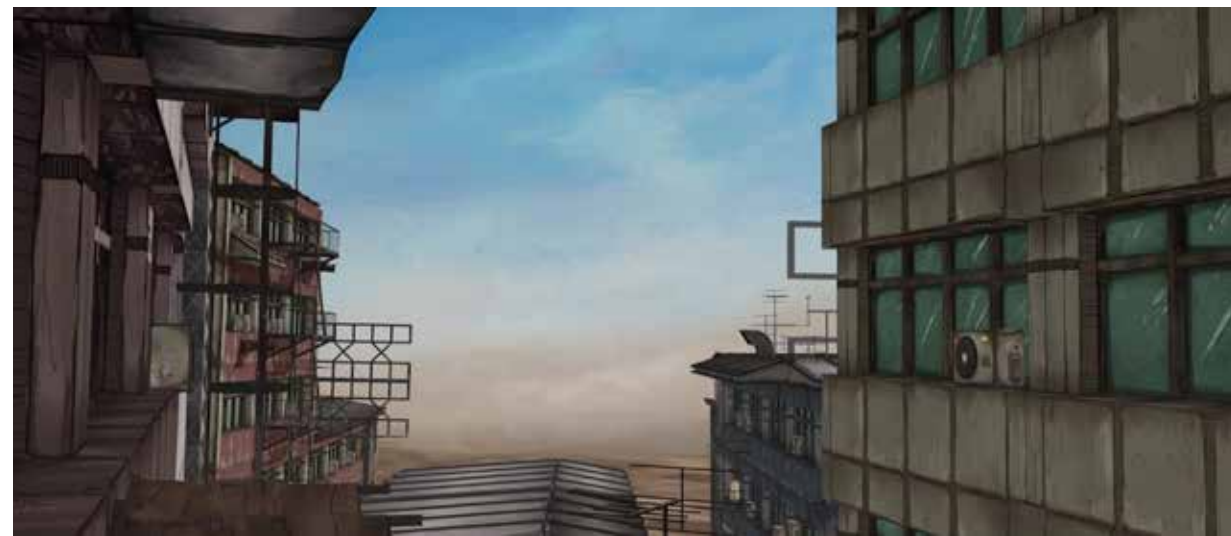

After initial sketches it was decided that the bike should function on one wheel, so I blocked out some ideas in 3D, loosely based on some unimoto drag racers.

DECAY

Short film in collaboration with
Asсен Stratiev and Marko Weiss.

Set in a postapocalyptic desert city, a racing car is searching for new competition.

My responsibilities include design, texturing and modelling.

Handpainted Textures in combination with Toonshading were used to achieve a stylized look.

We used a modular approach to modelling to make variations of the main buildings easy to achieve.

Teaser can be found here:
